## Foreword

This European Telecommunication Standard (ETS) has been produced by the Radio Equipment and Systems (RES), Technical Committee of the European Telecommunications Standards Institute (ETSI).

Annex A forms an integral part of this specification.

The PAP test specification ETS comprises seven parts:

Part 1: Overview.

Part 2: Portable radio Termination (PT) Abstract Test Suite (ATS) - versions available in both ISO 9646 TTCN.MP format (electronic) and TTCN.GR format (paper).

**Part 3: Portable radio Termination (PT) Protocol Implementation Conformance Statement (PICS) proforma.**

Part 4: Portable radio Termination (PT) Protocol Implementation eXtra Information for Testing (PIXIT) proforma.

Part 5: Fixed radio Termination (FT) Abstract Test Suite (ATS) - versions available in both ISO 9646 TTCN.MP format (electronic) and TTCN.GR format (paper).

Part 6: Fixed radio Termination (FT) Protocol Implementation Conformance Statement (PICS) proforma.

Part 7: Fixed radio Termination (FT) Protocol Implementation eXtra Information for Testing (PIXIT) proforma.

## Introduction

To evaluate conformance of a particular implementation, it is necessary to have a statement of which capabilities and options that have been implemented for the relevant protocol. Such a statement is called a Protocol Implementation Conformance Statement (PICS).

The supplier or a protocol implementation which is claimed to conform to ETS 300 175-9 [9] should complete a copy of the PICS proforma provided in Annex A, and should provide the information necessary to identify both the supplier and the implementation.

# 1 Scope

This European Telecommunication Standard (ETS) provides a PICS proforma for the network layer protocol requirements of ETS 300 175-9 [9] in compliance with the relevant requirements, and in accordance with the relevant guidance, given in ISO/IEC 9646-7 [14].

# 2 Normative references

This ETS incorporates, by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

## 3 Terms and definitions

For the purposes of this ETS, the following terms and definitions apply:

a) the terms defined in ISO/IEC 9646-7 [14];

b) the definitions in ETS 300 175-1 [1]; and

c) the following terms defined in ISO/IEC 9646-1 [10]:

- PICS proforma;
- Protocol Implementation Conformance Statement (PICS).

For the purposes of this ETS, the abbreviations defined in ISO/IEC 9646-1 [10], the network layer abbreviations defined in ETS 300 175-5 [5], and the following abbreviations apply.

| | |
|---|---|
| ACC | ACCount number |
| BACN | BCD coded Bank ACcount Number |
| CACN | BCD coded Credit card ACcount Number |
| CF | higher layer signalling Channel (Fast) |
| CI(GSM) | GSM Cell Identity |
| CLF | higher layer ConnectionLess channel (Fast) |
| CLS | higher layer ConnectionLess channel (Slow) |
| CTS | Conformance Testing Service |
| CS | higher layer signalling Channel (Slow) |
| DECT | Digital European Cordless Telecommunications |
| EEH | protocol Error and Exception Handling |
| EIC | Equipment Installer's Code |
| EMC | Equipment Manufacturer's Code |
| ELI | Extended Location Information |
| ETSI | European Telecommunications Standards Institute |
| ext | extension or extended |
| FPN | Fixed Part Number |
| FPS | Fixed Part Subnumber |
| GF | hiGher layer inFormation control channel |
| GOP | GSM OPerator code |
| IMSI | GSM International Mobile Subscriber Identity |
| IN | higher layer INformation channel (unprotected) |
| INFO | INFOrmation |
| IP | higher layer Information channel (Protected) |
| LAC | GSM Location Area Code |
| MI | Message type |
| MCC | GSM Mobile Country Code |
| MNC | GSM Mobile Network Code |
| NSAP | Network Service Access Point |
| PD | Protocol Discriminator |
| PDU | Protocol Data Unit |
| PICS | Protocol Implementation Conformance Statement |
| POC | Public Operator Code |
| RPN | Radio fixed Part Number |
| SIN | higher layer connectionless channel (unprotected) |
| SCS | System Conformance Statement |
| SDU | Service Data Unit |
| TMSI | GSM Temporary Mobile Subscriber Identity |
| TV | Transaction Value |
| TVX | eXtended Transaction Value |

# 5 Conformance requirement concerning PICS

The supplier of a protocol implementation which is claimed to conform to the network layer requirements of ETS 300 175-9 [9] shall complete a copy of the PICS proforma provided in Annex A and shall provide the information necessary to identify both the supplier and the implementation.

# Annex A (normative): PAP PICS Proforma for PT

## A.1 Introduction for completing the PICS proforma

Notwithstanding the provisions of the copyright Clause related to the text of the present ETS (see front page), ETSI grants users of this ETS to freely reproduce the PICS Proforma in this Annex so that it can be used for its intended purposes and may further publish the completed PICS.

### A.1.1 Purposes and structure

The purpose of this PICS is to provide a mechanism whereby a supplier of an implementation of the network layer requirements of ETS 300 175-9 [9]: PAP may provide information in a standard form.

The PICS proforma is subdivided into sections for the following categories of information:

a) implementation details;
b) protocol details;
c) overall conformance claims;
d) implementation capabilities:
   - services;
   - protocol parameter;
   - messages;
   - information elements;
   - procedures;
   - negotiation capabilities;
   - multilayer dependencies.

### A.1.2 Symbols, abbreviations and conventions

The PICS proforma contained in this Annex is comprised of information in a tabular form in accordance with the guidelines presented in ISO/IEC 9646-7 [14].

#### A.1.2.1 Standardised symbols for the status column

The standardised symbols for the status column are as follows:

- m or M for mandatory (the capability is required to be implemented);

- o or O for optional (Boolean) (the capability may be implemented);

- i or I for out-of-scope (the capability is allowed to be implemented but it is irrelevant and not subject for testing);

- x or X for prohibited or excluded (the capability may be allowed to be implemented in the base standard but in the PAP protocol it is not allowed);

- n/a, N/A or - (dash) for not applicable (the capability is not allowed because the underlying DECT layers (service provider) cannot handle it or the requirement belongs to an application i.e. does not belong to the network layer);

- c or C for conditional (the capability depends on the selection of other optional or/and conditional items).

If appropriate, a "C" followed by an integer is placed in the status column, providing a reference to a conditional status expression defined elsewhere in the PICS proforma.

#### A.1.2.2 Standardised symbols for the support column

The standardised symbols for the support column are as follows:

- Y, y, or Yes for implemented;

- N, n, or No for not implemented.

In each context, the kind of "non-support" which is implemented at the receipt may be additionally indicated such as:

- Err the item is treated as a protocol error;

- Ig the item is received and ignored (i.e. processed syntactically, but not semantically);

- rj the item is received and rejected.

#### A.1.2.3 The supported values column

A "supported" values column, if appropriate, in which the values or ranges of values supported can be indicated, as well as type and length, if relevant.

### A.1.3 Instructions for completing the PICS

The supplier of the implementation shall enter an explicit statement in each of the boxes provided using the notation described in subclause A.1.2. Specific instruction is provided in the text which precedes each table.

References within tables are to ETS 300 175-5 [5]: Network Layer (NL), except where explicitly stated. Although references are to ETS 300 175-5 [5], in the case of conflict the requirements of ETS 300175-9 [9]: PAP Clauses 5 and 6 shall take precedence.

NOTE: Where there are repeated fields within an information element the field number changes. Where there are different field value status for the same field the field is repeated with the same field number. For information elements, out-of-scope (I) means that a field may be present but its contents can be ignored.

## A.2 Identification of the implementation

### A.2.1 Date of statement

The supplier of the implementation shall enter the date of this statement in the box below.

Q.1 Date of statement

| Date of statement | | |
|---|---|---|
| **Day** | **Month** | **Year** |
| | | |

### A.2.2 Identification of the implementation

The supplier of the implementation shall enter information necessary to uniquely identify the implementation and the system(s) in which it may reside, in the box below.

Q.2 Identification of implementation

| Identification of implementation | |
|---|---|
| Name of Implementation | |
| Name of System | International Portable Equipment Identity (IPEI): |

### A.2.3 Contact person

The supplier of the implementation shall provide information on whom to contact if there are any queries concerning the content of the PICS, in the box below.

Q.3 Contact person

| Contact person | |
|---|---|
| Name | |
| Address | |
| Phone No. | |
| Fax No. | |

### A.2.4 Relationship with the System Conformance Statement (SCS)

The supplier of the implementation shall provide information which describes the relationship between the PICS and the system conformance statement for the system, in the box below.

Q.4 Relationship with SCS

| |
|---|
| |

## A.3 Identification of the protocol

The supplier of the implementation shall enter the title, reference number and date of the publication of the ETS DECT CI-Specification to which conformance is claimed, in the box below.

Q.5 Identification of protocol

| Identification of profile | |
|---|---|
| Title of specification | |
| Reference no. | |
| Date of Publication | |

### A.3.1 Defect report numbers and amendments implemented

The supplier of the implementation shall enter the reference number of implementation defect reports or corresponding amendment documents which modify the specification to ETS 300 175-9 [9]: PAP Layer, in the box below.

Q.6 Defect report and amendments number

| Modification of specification | |
|---|---|
| **Defect report no.** | **Amendment no.** |
| | |

### A.3.2 Addenda implemented

The supplier of the implementation shall enter the titles and the reference number of implemented addenda to ETS 300 175-9 [9]: PAP, in the box below.

Q.7 Addenda implemented

| Addenda implemented | |
|---|---|
| **Title** | **Reference no.** |
| | |
| | |
| | |

## A.4 Global statement of conformance

The supplier of the implementation shall state whether of not all mandatory capabilities are implemented for ETS 300 175-9 [9]: PAP.

Q.8 Global statement of conformance

| | |
|---|---|
| Are all mandatory capabilities implemented? | |

NOTE: Answering "No" to this question indicates non-conformance to the protocol specification. Non-supported mandatory capabilities are to be identified in the PICS, with an explanation of why the implementation is non-conforming.

## A.5 Capabilities

### A.5.1 Features

The supplier of the implementation shall state the support of the feature of the implementation, in the box below.

Q.9 Features support

### A.5.2.2 System wide parameters

System wide parameters have a single specification applicable for all network messages in which they occur and the corresponding tables in which they occur contain reference to the following declarations.

The supplier of the implementation shall state whether or not the following parameters specified by ETS 300 175-5 [5]: NL are supported and their type, value(s) and range(s), in the box below. The supplier shall indicate the status of support for sending and receiving each parameter.

Q.10.2 Protocol parameters

### A.5.2.3 Other parameters

Some parameters only occur in a limited number of network messages. Declaration of the support these parameters shall be specified in the tables in which they occur.

### A.5.3 Messages

The supplier of the implementation shall state whether or not the messages specified by ETS 300 175-5 [5]: NL are supported, in the boxes below. The supplier shall indicate the status of support for sending and receiving each message.

Note that extended transaction identifiers are not allowed within the PAP.

### A.5.7 Multi-layer dependencies

The supplier of the implementation shall provide information to identify the implementation support for specific requirements on the underlying layers, not made mandatory by the underlying lay protocol specifications, in the boxes below. Where appropriate, the supplier shall provide an external reference to the completed PICS for the layer standard.

### A.5.8 Real effects features

The supplier of the implementation shall state the support of the feature of the implementation, in the box below.

Q.84 Real effects feature support

| Real effects features supported | | | | |
|---|---|---|---|---|
| **Item no.** | **Name of feature** | **Ref.** | **Status** | **Support** |
| 1 | Low duty-cycle mode | part 9: 9.1 | O | |
| 2 | SARIs | part 9: 8.4.2.2 | M | |
| 3 | TARIs | part 9: 9.5 | O | |
| 4 | DAM card | part 7: Annex G | O | |
| | | | | |
| | | | | |
| | | | | |

### A.5.9 Application questions

The supplier of the implementation shall answer the following application questions in the boxes below.

Q.85 Dialling type

| Dialling types supported | | | | |
|---|---|---|---|---|
| **Item no.** | **Name** | **Comment** | **Value** | |
| | | | **Allowed** | **Supported** |
| 1 | p_dialling_type | 1 = piecewise dialling only<br>2 = en-bloc dialling in Overlap sending state only<br>3 = both piecewise and en-bloc dialling in Overlap sending state<br>4 = en-bloc dialling in {CC-SETUP} only<br>5 = both piecewise and en-bloc dialling in {CC-SETUP}<br>6 = both en-bloc dialling in {CC-SETUP} and en-bloc dialling in Overlap sending state.<br>7 = all dialling types i.e. piecewise, en-bloc dialling in Overlap sending state and en-bloc dialling in {CC-SETUP} | 1,2,3,4,5,6,7 | |

Q.86 PT initiated parameter retrieval parameter type support

| PT initiated parameter retrieval parameter types supported | | | | |
|---|---|---|---|---|
| **Item no.** | **Name of parameter type** | **Ref.** | **Status** | **Support** |
| 1 | location area | part 5: 7.7.20 | O | |
| 2 | old fixed identity | part 5: 7.7.20 | O | |
| 3 | old network assigned location area | part 5: 7.7.20 | O | |
| 4 | old network assigned identity | part 5: 7.7.20 | O | |
| 5 | old network assigned handover reference | part 5: 7.7.20 | O | |
| 6 | billing | part 5: 7.7.20 | O | |
| 7 | debiting | part 5: 7.7.20 | O | |
| 8 | locate suggest | part 5: 7.7.20 | X | |
| 9 | external handover parameters | part 5: 7.7.20 | O | |
| 10 | handover reference | part 5: 7.7.20 | O | |
| 11 | external handover candidate | part 5: 7.7.20 | O | |
| 12 | synchronised external handover candidate | part 5: 7.7.20 | O | |
| 13 | non synchronised external handover candidate | part 5: 7.7.20 | O | |
| | | | | |

Q.87 Other feature

| **Other feature** | | | | |
|---|---|---|---|---|
| **Item no.** | **Name of feature** | **Ref.** | **Status** | **Support** |
| 1 | p_defined_time | part 5: 7.7.13 | O | |
| 2 | p_GSM_derived_cipher_key | part 5: 7.7.24 | O | |
| 3 | p_sel_lin | part 5: 7.7.16 | O | |
| 4 | p_feature_key | part 5: 7.7.16 | O | |
| | | | | |
